

# COBB AT SANGRE DE TORO RECEIVES GREATEST OVA OF THE CAMPAIGN

Congressional Candidate Addresses Audience Larger Than the Big One That Greeted Hobby and Stirs Hearers to Wild Enthusiasm; Questions Asked by Hudspeth Men Prove Boomerangs.

By GEORGE H. CLEMENTS.

SAN ANGELO, Tex., July 2.—If there were any doubt as to where the voters of San Angelo and Tom Green county stood on the race between Zach Lammie Cobb and his opponent in the congressional race in the 16th district, that doubt was dispelled Monday night when 1,000 cheering enthusiastic voters gathered on the lawn surrounding the Tom Green county court house, to listen to a discussion of the issues of the campaign presented by the "little giant of El Paso county."

In Demonstration for Cobb.

The demonstration took the form of an evening for Cobb, the champion of right in politics and the champion of the moral forces which have for their purpose in the fight now being waged, the clearing of the western states as long dominated by the liquor interests of Texas, to the detriment of the best interests of the state.

The meeting and the enthusiasm displayed were revelations even to the most ardent supporters of Cobb in San Angelo, and the prediction is freely made by the most conservative this morning, that the issue of the campaign of 1918 for Cobb, talked of before the meeting, it will be fully 1918, if indeed it does not reach the 1919 mark, when the ballots are counted at the close of the voting on primary day.

Heads had been turned in the past by the speaker, who was in charge of the demonstration, that was all, they said, that had been provided for the Hobby meeting, and the Monday night gathering, and it was not thought possible that a candidate for congress could draw as heavily as a gubernatorial candidate who was as well known to the voters of the state.

It was a Cobb crowd from the outset and by its openly manifested friendliness inspired Mr. Cobb when he was introduced to begin his speech. He made one of the best speeches of the campaign, though he admitted that he was a novice in the line of oratory, and the crowd of his opponent on the moral questions which are involved in the race for congress.

Contrary to his usual custom, the speaker did not attempt to win favor by flights of oratory, depending solely upon a serious setting forth of the facts as they are, and the crowd of Cobb versus Hudspeth, before the bar of public opinion.

A feature of the meeting was the presence in a front seat of the manager of Hudspeth headquarters in this city, who was joined by a long list of questions which he asked permission to present when Mr. Cobb issued his usual invitation to those who might have questions to ask.

Asked Some Old Questions. The questions were the same questions which have been asked by Hudspeth supporters since the campaign opened, based upon the trivial, so-called charges made in the campaign literature sent out by the El Paso county campaign manager, and made by Hudspeth himself in some of his speeches.

Tells of Early Speeches. Mr. Cobb answered all the questions propounded so readily and so ably that he won the crowd and had to urge his friends to restrain the questions to be asked as a favor to him. He admitted having made a speech at the planning of the El Paso campaign when El Paso was not as big as it is now, and when all citizens were glad to welcome another speaker to the community. He also admitted having made a speech on the occasion of presenting a gold star to a child of a soldier who had been killed in the war.

By this time the audience asked the question if he had nothing to say to the crowd, and he said he was so busy that he could not leave his home to go to a crowd of 1,000 people, and he said that he was so busy that he could not leave his home to go to a crowd of 1,000 people.

There are quite as many reasons for women voting as men, but the reason that should be given the most consideration is her opportunity to help in the nation of reform—particularly prohibition.

Women—despite the handicaps of registration.

# HOBBY STATE SUPPORTS COBB

Dallas Paper Points to Hudspeth's Alleged Remarks at Houston.

"Again we want to call the attention of our good prohibition friends in the 16th (El Paso) congressional district to their opportunity to do the wise and right thing in the election of Hon. Zach Lammie Cobb, his opponent, state senator Claude Hudspeth, is a reliable gentleman, but the liquor interests of Texas have never had a truer and better friend, or a more faithful advocate and champion."

"It is editorial comment by the Home and State, a Dallas paper of wide circulation over the 16th district."

"The voters of the district are almost unanimously in favor of prohibition. Mr. Hudspeth is an anti and has been one of the most faithful and efficient advocates of the liquor traffic in Texas, or elsewhere for that matter. On that ground alone, voters of the 16th district cannot afford to send him to congress."

"Another question of even more serious moment in his attitude toward the national administration. We can afford to send him to congress who are not in full sympathy with the national administration, and the policies of our government in this time of world peril and world struggle. The civilization of the whole world is involved in the present war, and our government is looked to as the chief factor in the solution of all existing problems. The national administration, whose masterful policies are the product of the brain and heart of Woodrow Wilson, is at the present time the chief hope of the world. The man who is not with that administration heart and soul ought not to be considered for a moment as a congressional possibility."

"Not 'Shipping Over.' In the Houston Post of Aug. 4, 1915, is given a report of a meeting held in Houston the night before the inauguration of Mr. Cobb. Mr. Hudspeth was chairman of the meeting. Mr. Cobb was present and made a speech. After declaring that the liquor interests had not supported Mr. Cobb, and declaring that the liquor interests were the enemy of the national administration, he said he himself was not in sympathy with the national administration, and that he was not in sympathy with the national administration, and that he was not in sympathy with the national administration."

"To Remove Mine Sheds. In charge of operations will be E. E. Vanhook, who has been in charge of steam shovel operations on the Nevada Consolidated for 15 years past. The only delay comes through the necessity of sending a man of the mine to the city to get a permit to remove the mine sheds."

"Cleansing Old Tunnel. Verde Central, formerly known as the Verde King, is being revived, and its 1,000 feet tunnel is being cleaned out to be continued on to the cutting of the mineralized dyke that was its original objective."

"Or is to be accepted at the Verde Extension smelter from the Verde King, is being revived, and its 1,000 feet tunnel is being cleaned out to be continued on to the cutting of the mineralized dyke that was its original objective."

# VERDE EXTENSION TUNNEL ACTING QUICKER THAN WAS EXPECTED.

Jerome, Ariz., July 2.—Drainage of the Verde shaft by the United Verde Extension tunnel has been anticipated, yet it has been believed that little effect would be known till the tunnel approached close to the Verde-Arizona ground. The happy result has come much earlier. While the tunnel heading is still distant, the shaft now is practically dry.

Work was stopped by the sinking of the shaft when the cost of pumping had risen to a prohibitive figure, and the water rose 50 feet in the 500 foot shaft. Two days later, the water level had been dropping nine feet a week, and this decrease is expected to be continued till the ground has been drained to 250 feet, the depth at which the tunnel will pass.

The drainage of the shaft is being hastened at the Verde shaft of the Extension, at large cost, two tunnel headings now being driven from the shaft toward the Verde shaft.

Some ore already has been cut in the shaft, and the surface is a large blanket of 7 percent carbonate.

It had been hoped that the great tunnel would have been finished in time to supply ore for the new Verde Extension smelter in the Verde valley, but completion of the great bore still is a matter of the future.

The smelter will be blown in within a few days, there having been delay only because of the lack of an electric motor and a switchboard, the 400-ton reverberatory furnaces will be operated for six weeks before the smelter will be ready to start.

Definite determination has been made that the system above mentioned on the peak of the Verde Extension body will be in progress within four months, without regard to length of service or relative competency. Hereafter there will be a flat annual bonus of \$100 for men who serve a year, with \$10 extra for each additional year of service, up to a minimum of \$250 per annum.

The mine shows are to be moved to a point north of the city, on the Verde level, as the ground on which they now stand is to be leveled away. A small amount of overhead work is to be started at once and is to be utilized in the leveling of building sites on the hillside. The ore to be shipped will be of the highest grade, and will embrace some of the earliest workings.

# ARIZONA PRODUCING MORE COPPER THAN COUNTRY IS EXPORTING.

Douglas, Ariz., July 2.—It is a source of pride among Arizona smelter men that Arizona now is turning out more copper than the nation is shipping to Europe. In fact, the Arizona production is 20,000,000 pounds a month more than the exports, which now are decreasing, compared with the peak figures of last year. Possibly some copper is being displaced at present by the necessity for shipping men and supplies, though there is no better basis for freight than before, but the more potent reason given is that the United States now is shipping more copper in the form of manufactured products.

A tremendous economic waste is known continually at every Arizona smelter, except the Calumet & Arizona and Arizona Copper, in the sulphur fumes that pour from every furnace chimney. These fumes are a second byproduct that could be separated at need. The C. A. has a market for its sulphur fumes, and the other smelters are beginning to look for a market for theirs.

Higher Rates Will Hurt. The Copper Queen smelters here could be fitted up in the same manner and could produce twice as much as the others, but the cost of production would be a million or more dollars and the market for the output is not a sure or profitable one, even considering the war needs. There is some suggestion that such an acid product might be consumed in the manufacture of fertilizer.

The new freight rates are expected to hit the small mine operator very hard. Many of the prospects that are shipping here are "getting by" with low-grade ores, with the profit margin being very small. The average added cost per ton has been figured at \$1.25. Bullion shipments east from El Paso will be taxed to \$10 a ton.

Copper Queen To Pay Bonus To Men Based On Length Of Service. El Paso, Ariz., July 2.—The Copper Queen company is building up a new organization of workers with the hope that permanency and efficiency will be known throughout the immense force. The mine wage today is \$2.25, without regard to length of service or relative competency. Hereafter there will be a flat annual bonus of \$100 for men who serve a year, with \$10 extra for each additional year of service, up to a minimum of \$250 per annum.

The mine shows are to be moved to a point north of the city, on the Verde level, as the ground on which they now stand is to be leveled away.
